

Ankita Yadav

AI/ML Engineer | Data & Automation | Software Engineering
9082461978 | rebank2125@gmail.com | Mumbai, India | LinkedIn | GitHub

Summary

AI/Software Engineer with hands-on experience building Generative AI applications (LLMs, RAG, AI agents), machine learning models, cloud data pipelines, and automation workflows for enterprise clients across fintech, retail, and logistics. Skilled in LLM orchestration (LangChain, CrewAI, RAG), Python/Java/JavaScript software development, REST APIs, Git/GitHub version control, AWS cloud services, and workflow automation, with strong stakeholder engagement in fast-paced, remote-collaborative environments.

Technical Skills

Generative AI / ML: OpenAI, Anthropic (Claude), LangChain, CrewAI, Hugging Face, TensorFlow, PyTorch, scikit-learn, RAG, LLMs, AI Agents, Multi-Agent Systems, Embeddings, Retrieval, Prompt Engineering, NLP, Pattern Recognition, Neural Networks, Model Evaluation

Data Engineering & Analytics: SQL, Python, ETL/ELT, Data Warehousing, Data Pipelines, Data Validation & Reconciliation, Trend & Outlier Analysis, Hypothesis Testing, A/B Testing, Anomaly Detection

Cloud & DevOps: AWS, EC2, ELB, S3, DynamoDB, Docker, Kubernetes, CI/CD, Kafka, Spark, Workflow Automation, Power Automate, Make.com, PowerApps

Software Engineering: Python, Java, JavaScript, TypeScript, Node.js, REST APIs, Git, GitHub, System Design, Object-Oriented Programming, HTML/CSS, Agile/Scrum, Debugging & Testing

Core Competencies: Stakeholder Engagement, Solution Architecture, Business Analysis, Project Management, Remote Collaboration, Tableau, Power BI, Pandas

Experience

Formula2GX Digital

May 2025 – Apr 2026

AI Engineer

- Delivered Generative AI solutions using LLMs, RAG, and prompt engineering (LangChain, CrewAI, OpenAI) alongside ML models and cloud data pipelines for enterprise clients including WESCO and Crown Commercial Service, collaborating with CEO and leadership on requirements and solution design.
- Built and maintained cloud data pipelines and containerized workflows using AWS (EC2, ELB, S3, DynamoDB), Docker, and Kubernetes alongside Python ETL and Make.com/PowerApps/Power Automate integrations.
- Built and evaluated RAG-based retrieval and LLM agent workflows, performing root cause analysis and iterating to improve reliability; used Git/GitHub for version control and built Tableau dashboards for KPI tracking.

Apps AIT

Jul 2024 – Sep 2024

Market Analyst Intern

- Analysed market trends using Python and Tableau for clients; developed segmentation strategies increasing campaign ROI by 15% through data-driven, hypothesis-tested process improvements.

VIT

Oct 2024 – Dec 2024

Computer Vision Research Intern

- Processed satellite imagery with OpenCV; applied pattern recognition and clustering algorithms achieving 89% accuracy in tree segmentation, with statistical evaluation of model performance.

Projects

Multi-Agent AI Orchestration System | *Python, LangChain, CrewAI, OpenAI, RAG, Slack API, Git/GitHub*

- Built an autonomous, event-driven LLM agent pipeline for market research using RAG-based retrieval and ReAct reasoning loops; reduced AI hallucinations by 40% and integrated Slack webhooks for real-time workflow automation.

AI Research Paper Evaluation Platform | *React, Firebase, Python, SQL, Node.js, Role-Based Access*

- Developed a React frontend and Node.js/Python backend for a role-based data platform with automated scoring and NLP-driven plagiarism detection, reducing evaluation time by 60%; maintained issue logs via Git/GitHub.

Education

Thakur College of Engineering and Technology, Mumbai

Expected Jun 2026

B.Tech in Artificial Intelligence & Data Science — CGPA: 8.94 / 10.0

Leadership & Extracurricular

Society for Data Science

2023 – 2025

Treasurer

- Managed club finances and coordinated data science workshops and hackathons for 100+ members, applying project management and stakeholder communication skills.

Shastra Coding Club

2023 – 2024

Research Team Member

- Contributed to research initiatives and technical problem-solving; collaborated with cross-functional teams on coding challenges and process improvement projects.

Certifications

Data Science with Python — NPTEL (IIT Certification)

Machine Learning — freeCodeCamp
