

Ankita Yadav

Software Engineer | JavaScript & React | Agentic AI
9082461978 | rebank2125@gmail.com | Mumbai, India | LinkedIn | GitHub

Summary

Software Engineer and B.Tech graduate with hands-on experience building, debugging, and shipping full-stack web applications using JavaScript/TypeScript, React, Node.js, and REST APIs. Experienced translating requirements into working UI components and backend services, testing and iterating on functionality, and rapidly learning new tools and frameworks. Additional hands-on experience building agentic/multi-agent AI systems, directly relevant to Netomi's agentic AI platform for customer experience.

Technical Skills

Frontend: JavaScript, TypeScript, React, HTML5, CSS3, Component-Based UI Development, Responsive Design

Backend & APIs: Node.js, Python, REST APIs, API Integration, Webhooks, SQL, Firebase

Software Engineering: Debugging, Troubleshooting, Root Cause Analysis, Testing, Automation, Git, GitHub, Agile/Scrum

AI / Agentic AI: Generative AI, LLMs, AI Agents, Multi-Agent Systems, RAG, NLP, OpenAI, Anthropic (Claude), LangChain, CrewAI, Hugging Face

Cloud & Data: Azure, Azure Data Factory, Azure Synapse, Databricks, ETL/ELT

Experience

Formula2GX Digital

May 2025 – Apr 2026

AI Engineer

- Built and delivered AI/ML and Generative AI solutions for international enterprise clients including WESCO and Crown Commercial Service, translating ambiguous requirements into working software.
- Developed Python-based automation and REST API integrations, reducing manual effort; investigated technical issues through root cause analysis, debugging, and log analysis.
- Built and tested AI agent workflows involving LLMs, RAG, and retrieval, evaluating outputs and iterating to improve reliability, in a fast-paced, Agile-driven setting.

Apps AIT

Jul 2024 – Sep 2024

Market Analyst Intern

- Analysed data using Python and automated reporting workflows; developed and tested hypothesis-driven segmentation logic, increasing campaign ROI by 15%.

VIT

Oct 2024 – Dec 2024

Computer Vision Research Intern

- Built and debugged an OpenCV-based image-processing pipeline in Python; applied pattern recognition and clustering algorithms, iterating to reach 89% accuracy in tree segmentation.

Projects

AI Research Paper Evaluation Platform | React, Node.js, Python, SQL, Firebase, REST APIs

- Built the React frontend for a role-based research-paper evaluation platform, translating UI requirements into reusable, component-based views.
- Developed Node.js and Python backend services with REST APIs, SQL, and Firebase for automated scoring, NLP-driven plagiarism detection, and audit-style logging.
- Implemented role-based access control and automated evaluation workflows, reducing manual evaluation time by 60%.

Multi-Agent AI Orchestration System | Python, LangChain, CrewAI, OpenAI, REST APIs, Slack API

- Designed and built an event-driven multi-agent software system using Python, LLMs, and ReAct-based reasoning to automate research and reporting.
- Implemented agent orchestration, retrieval, and tool/API integrations; added evaluation logic that reduced AI hallucinations by 40% and integrated Slack webhooks for real-time delivery.

Education

Thakur College of Engineering and Technology, Mumbai

Expected Jun 2026

B.Tech in Artificial Intelligence & Data Science — CGPA: 8.94 / 10.0

Leadership & Extracurricular

Society for Data Science

2023 – 2025

Treasurer

- Managed club finances and coordinated data science workshops and hackathons for 100+ members, applying ownership and cross-team communication.

Shastra Coding Club

2023 – 2024

Research Team Member

- Contributed to research initiatives and technical problem-solving with cross-functional teams on coding challenges.

Certifications

Data Science with Python — NPTEL (IIT Certification)

Machine Learning — freeCodeCamp
