

JOB DESCRIPTION

Physique 57 is a globally recognized, premium fitness brand delivering a distinctive, results-driven barre workout experience. With a strong presence across key international markets and a growing footprint in India, Physique 57 represents luxury, precision, and an uncompromising commitment to client excellence.

As we scale, we are building a next-generation unified tech ecosystem that powers the entire client journey — from lead acquisition to retention — through a seamless integration of CRM, operations, communication, and AI.

The **Product & Systems Manager – CRM & Automation** will be responsible for designing, implementing, and continuously optimising this unified customer and operations engine. This is a high-impact role that sits at the intersection of technology, operations, sales, and client experience, ensuring that all systems work seamlessly in real time.

Location: Mumbai, India

Reporting To: Head of Sales & Client Servicing

This role owns the end-to-end system architecture and execution of Physique 57's unified engine, including CRM, communication systems, automation workflows, analytics, and deep integration with Momenca.

The role will ensure:

- A single source of truth for all client data
- Seamless real-time system integration
- Automated workflows across the client lifecycle
- Data-driven insights across sales, operations, and retention

RESPONSIBILITIES:

1) CRM & Client Intelligence Ownership

- a) Build and manage a centralized CRM system with complete 360° client profiles (attendance, purchases, engagement, communication history)
- b) Design and implement lifecycle tagging (new » active » at-risk » churned)
- c) Own the lead-to-member conversion pipeline and ensure effective tracking and follow-ups

- d) Enable full visibility of the client journey across all touchpoints

2) Communication & Automation Systems

- a) Set up and manage the unified communication ecosystem (WhatsApp, Instagram, email, web chat) via Intercom. Build and optimize automated workflows for:
 - i) Lead nurturing
 - ii) Trial follow-ups
 - iii) Retention and win-back campaigns
- b) Milestones, birthdays, and engagement triggers
- c) Ensure all communication is behaviour-triggered and data-driven
- d) Oversee AI agent performance, lead qualification, and handoff to sales teams

3) Feedback, NPS & Helpdesk Systems

- a) Implement and manage post-class feedback and NPS systems.
- b) Ensure feedback is linked directly to client profiles for actionable insights.
- c) Build and manage the helpdesk/ticketing system with SLA tracking and escalation workflows.
- d) Enable real-time alerts for negative feedback and critical issues.
- e) Track resolution metrics and continuously improve service response quality

4) Momence Integration Ownership

- a) Own the deep API integration between Momence and internal systems.
- b) Ensure real-time, bi-directional sync of:
 - i) Bookings
 - ii) Attendance
 - iii) Purchases
 - iv) Client data
- c) Design and implement event-based triggers from Momence data:
 - i) Missed class » follow-up workflows
 - ii) Inactivity » churn prevention journeys
 - iii) Purchases » onboarding and upsell journeys
- d) Eliminate manual data handling and ensure full system automations.
- e) Maintain data consistency across CRM, communication tools, and reporting

systems

5) Analytics, Reporting & Insights

- a) Build and manage dashboards for:
 - i) Retention and churn
 - ii) Revenue (per client, class, instructor)
 - iii) Marketing attribution
- b) Implement automated daily and monthly reporting with AI-driven insights.
- c) Ensure a unified reporting layer across sales, operations, and finance.
- d) Identify trends, gaps, and opportunities to improve performance

6) AI & Personalisation Systems

- a) Implement AI-driven features including:
 - i) Class recommendations
 - ii) Churn prediction models
 - iii) Dynamic pricing strategies
- b) Enable personalised communication and content based on client behaviour.
- c) Continuously improve AI models based on data and outcomes

7) Cross-Functional Collaboration

- a) Work closely with Sales, Operations, and CST teams to ensure system adoption and effectiveness.
- b) Act as the bridge between business teams and technology systems.
- c) Drive training, SOPs, and best practices for system usage.
- d) Continuously gather feedback and improve system workflows

REQUIREMENTS:

- 1-3 years of experience in product, CRM, growth, or systems roles
- Strong understanding of CRM systems, automation tools, and integrations
- Experience working with APIs, system integrations, or no-code/low-code platforms
- Data-driven mindset with strong analytical and problem-solving skills
- Experience with tools like Intercom, HubSpot, Zapier, or similar platforms is a plus
- Strong understanding of customer lifecycle, retention, and engagement strategies
- Ability to manage multiple systems and workflows simultaneously

- High ownership, execution focus, and attention to detail
- Strong communication and cross-functional collaboration skills
- Preference will be given to candidates with some level of coding experience or full-stack development skills (e.g., familiarity with JavaScript, Python, SQL, or modern web frameworks).

CONFIDENTIAL
