

Ankita Yadav

Process Automation Analyst | Data & Workflow Automation | AI/ML
9082461978 | rebank2125@gmail.com | Mumbai, India | LinkedIn | GitHub

Summary

Automation-focused Engineer with hands-on experience designing data automation solutions, low-code/no-code workflows, and API integrations for enterprise clients across fintech, retail, and logistics. Skilled in SQL, Python, and JavaScript, with familiarity in Xceptor and Sigma Computing, and hands-on experience with Power Automate, Make.com, and PowerApps. Experienced in gathering business requirements, translating them into technical specifications, building automation frameworks, and using data analysis to drive process optimization and data-driven decision-making in fast-paced, stakeholder-facing environments.

Technical Skills

Process Automation & Low-Code/No-Code: Xceptor (familiarity), Sigma Computing (familiarity), Kissflow, Power Automate, Make.com, PowerApps, Workflow Automation, API Integrations
Programming & Data: SQL, Python, JavaScript, TypeScript, ETL/ELT, Data Warehousing, Data Pipelines, Data Validation & Reconciliation, Trend & Outlier Analysis
Cloud & DevOps: AWS, EC2, ELB, S3, DynamoDB, Databricks, Docker, Kubernetes, CI/CD, Kafka, Spark
AI / ML: Generative AI, LLMs, AI Agents, RAG, LangChain, CrewAI, OpenAI, NLP, Model Evaluation
Software Engineering & Core Competencies: Node.js, REST APIs, Git, GitHub, System Design, OOP, Agile/Scrum, Debugging & Testing, Stakeholder Engagement, Requirements Gathering, Business Analysis, Solution Architecture, Project Management

Experience

- Formula2GX Digital** May 2025 – Apr 2026
AI Engineer
 - Delivered Generative AI and automation solutions for enterprise clients including WESCO and Crown Commercial Service, gathering requirements and translating them into technical specifications.
 - Built cloud data pipelines and low-code/no-code automation workflows using AWS (EC2, ELB, S3, DynamoDB), Docker, Python ETL, and Make.com/PowerApps/Power Automate integrations.
 - Performed root cause analysis and iterative testing on automation workflows; used Git/GitHub for version control and built Tableau dashboards for KPI tracking.
- Freelance** 2024 – 2025 (approx. 6 months, part-time)
Process Automation (Independent)
 - Delivered freelance process automation and workflow scripting projects for small business clients on a part-time basis alongside coursework.
- Apps AIT** Jul 2024 – Sep 2024
Market Analyst Intern
 - Analysed market trends using Python and Tableau for clients; developed segmentation strategies increasing campaign ROI by 15% through data-driven, hypothesis-tested process improvements.
- VIT** Oct 2024 – Dec 2024
Computer Vision Research Intern
 - Processed satellite imagery with OpenCV; applied pattern recognition and clustering algorithms achieving 89% accuracy in tree segmentation, with statistical evaluation of model performance.

Projects

- Multi-Agent AI Orchestration System** | *Python, LangChain, CrewAI, OpenAI, RAG, REST APIs, Slack API*
- Built an autonomous, event-driven automation pipeline using RAG-based retrieval and ReAct reasoning loops; reduced AI hallucinations by 40% and integrated Slack webhooks for real-time workflow automation.
- AI Research Paper Evaluation Platform** | *React, Firebase, Python, SQL, Node.js, Role-Based Access*
- Developed a React frontend and Node.js/Python backend with automated scoring, NLP-driven plagiarism detection, and audit-style logging, reducing manual evaluation time by 60%.

Education

- Thakur College of Engineering and Technology, Mumbai** Expected Jun 2026
B.Tech in Artificial Intelligence & Data Science — CGPA: 8.94 / 10.0

Leadership & Extracurricular

- Society for Data Science** 2023 – 2025
Treasurer
 - Managed club finances and coordinated data science workshops and hackathons for 100+ members.
- Shastra Coding Club** 2023 – 2024
Research Team Member
 - Contributed to research initiatives and technical problem-solving with cross-functional teams on coding challenges.

Certifications

- Data Science with Python — NPTEL (IIT Certification)
Machine Learning — freeCodeCamp
