

# Ankita Yadav

AI Engineer | Product Engineering | Generative AI

9082461978 | rebank2125@gmail.com | Mumbai, India | LinkedIn | GitHub

## Summary

AI Engineer and B.Tech graduate with hands-on experience building and debugging AI-driven software, backend services, REST APIs, and automation workflows. Skilled in Python, JavaScript/TypeScript, Git/GitHub, Generative AI, LLMs, RAG, and AI agents. Experienced in root cause analysis, testing, and rapidly learning unfamiliar technologies, with a focus on building practical, reliable software and automating repetitive processes.

## Technical Skills

**Programming:** Python, JavaScript, TypeScript, SQL

**Software Engineering:** Python Development, Backend Development, REST APIs, API Integration, Debugging, Troubleshooting, Root Cause Analysis, Testing, Automation, Git, GitHub, Agile/Scrum

**AI / ML:** Generative AI, LLMs, AI Agents, Multi-Agent Systems, RAG, NLP, Machine Learning, Model Evaluation, OpenAI, Anthropic (Claude), LangChain, CrewAI, Hugging Face, scikit-learn, TensorFlow, PyTorch

**Cloud, Data & DevOps:** Azure, Docker, CI/CD, Azure Data Factory, Azure Synapse, Databricks, ETL/ELT

**Web & Integration:** Node.js, REST APIs, API Integration, Slack API, Webhooks

## Experience

### Formula2GX Digital

Sep 2025 – Mar 2026

*AI Engineer*

- Built and delivered AI/ML and Generative AI solutions for international enterprise clients including WESCO and Crown Commercial Service, translating ambiguous requirements into working software; developed Python-based automation and REST API integrations, reducing manual effort.
- Investigated technical issues through root cause analysis, debugging, and log analysis; built and tested AI workflows involving LLMs, RAG, and agents, evaluating outputs to improve reliability.
- Worked across unfamiliar technologies and requirements, rapidly learning new tools/frameworks to deliver PoCs; collaborated with stakeholders in an Agile environment through requirements gathering and testing.

### Apps AIT

Jul 2024 – Sep 2024

*Market Analyst Intern*

- Analysed data using Python and automated reporting workflows; developed and tested hypothesis-driven segmentation logic, increasing campaign ROI by 15%.

### VIT

Oct 2024 – Dec 2024

*Computer Vision Research Intern*

- Built and debugged an OpenCV-based image-processing pipeline in Python; applied pattern recognition and clustering algorithms, iterating to reach 89% accuracy in tree segmentation.

## Projects

### Multi-Agent AI Orchestration System | *Python, LangChain, CrewAI, OpenAI, REST APIs, Slack API*

- Designed and built an event-driven multi-agent software system for automated market research using Python, LLMs, and ReAct-based reasoning.
- Implemented agent orchestration, retrieval, and tool/API integrations to automate research, analysis, and report generation.
- Added evaluation and validation logic to catch incorrect model outputs, reducing AI hallucinations by 40%; integrated Slack webhooks for real-time workflow delivery.

### AI Research Paper Evaluation Platform | *Python, Node.js, SQL, Firebase, NLP, Role-Based Access*

- Developed a backend-driven application for automated research-paper evaluation using Python, Node.js, SQL, and NLP.
- Implemented role-based access control, automated scoring, and audit-style logging; built automated plagiarism detection, reducing manual evaluation time by 60%.

## Education

### Thakur College of Engineering and Technology, Mumbai

Expected Jun 2026

*B.Tech in Artificial Intelligence & Data Science — CGPA: 8.94 / 10.0*

## Leadership & Extracurricular

### Society for Data Science

2023 – 2025

*Treasurer*

- Managed club finances and coordinated data science workshops and hackathons for 100+ members, applying ownership and cross-team communication.

### Shastra Coding Club

2023 – 2024

*Research Team Member*

- Contributed to research initiatives and technical problem-solving with cross-functional teams on coding challenges.

## Certifications

Data Science with Python — NPTEL (IIT Certification)

Machine Learning — freeCodeCamp
